EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Grant Pollack on May 7 2010.

The application has been amended as follows:

Claims

- *Claim 5 line 6, before the word "recordable" insert the word –or–*
- *Claim 5 line 13, before the phrase "generated and/or activated", delete the phrase –may be—and replace with phrase –are–*
- *Claim 5 line 20, before the phrase "generated or activated", delete the phrase –may be—and replace with phrase –are–*

2. The following is an examiner's statement of reasons for allowance:

In reference to claim 5, the prior art does not teach nor suggest an electronic keyboard instrument defined by upper and lower surfaces arranged generally parallel to one another with corresponding opposing curvilinear edges, and side surfaces separating the upper and lower surfaces, the side surfaces having edges for sealing engagement with the curvilinear edges, the instrument comprising a controller for

enabling activation of electronic signals having audible, visible, amplifiable, or recordable characteristics, a power source for operating the controller; a first arcuate keyboard having a first selected length and oriented in a first position such that (i) audible notes of music from at least one internal sound module and/or at least one external sound module, (ii) recordable data to be enhanced or modified by an external sequencer or program controlled apparatus, (iii) photoelectric signals, and (iv) processes or mechanisms, triggered or controlled by external signals or data, for controlling machines, video playback or lighting, are generated and/or activated using a first hand of a user; a second arcuate keyboard having a second selected length, the second keyboard being generally coextensive with the first and oriented in a fashion generally opposite to that of the first such that (i) audible notes of music from at least one internal sound module and/or at least one external sound module, (ii) recordable data to be enhanced or modified by an external sequencer or program controlled apparatus, (iii) photoelectric signals, and (iv) processes or mechanisms, triggered or controlled by external, signals or data, for controlling machines, video playback or lighting, are be generated and/or activated using a second hand of the user; each of the first and second arcuate keyboards being characterized by keys of continuously varying length, the keys being generally longer at the respective keyboard ends and shorter at the respective keyboard center so as to define an arcuate shape and enhance user operation, an interface for connecting the controller to at least one external device having sound module, and/or sequencing and signal enhancement functions, a plurality of peripheral devices associated with the controller for interactive control and

manipulation of the signals, and a wearable support mounted to the instrument for suspending the first and second keyboards from the user's body during instrument operation. The combinations of the claimed limitations are novel and found to be allowable over prior art. The cited references taken singly or in combination do not anticipate nor make obvious applicant's claimed invention.

Claims 47-49 depend on claim 5 and therefore inherit all allowed claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
